

BarKoder for Windows™

BarKoder for Windows™ is designed for use with IBM® PC and compatible computers running under Windows V.3.1. (Minimum 80386, MS DOS 5.0 & MS Windows 3.1 or above.) **BarKoder for Windows™** allows the user to create and print LaserBarcode™ (LB) and LaserBarcode 2™ (LB2) and Barcode CD™ (BC-CD) standard barcodes. These barcodes can be scanned and commands sent to compatible players for rapid access of selected video or audio segments of LaserDiscs or CD audio discs. **BarKoder for Windows™** also allows the user to create Barcode CD barcodes to access specific tracks, blocks or indices, or to playback timed audio segments from audio compact discs on Barcode CD compatible players, such as the CLD-V2600 or the CLD-V2400.

The barcodes can be scanned with Pioneer UC-V108BC or UC-V109BC barcode readers or UC-V104BC (discontinued).

BarKoder for Windows™ enables you to:

- Produce barcodes to play a specific video and /or audio sequence on an LD or a specific audio segment on a CD.
- Produce barcodes to search to LD frames, chapters or time numbers.
- Produce barcodes to play a chapter or consecutive group of chapters on LDs or to access tracks, indices or time numbers on CDs.
- Encode individual direct player commands in LD barcodes, such as play, stop, etc.
- Use the **Smart Media Control Panel** with a player attached to the computer to find different locations on the disc. You can also drag and drop beginning and end points of an indicated segment into the Barcode creation box, or you can use **Smart Links** to automatically update start and end points of barcodes as the controls are used to move to different locations on the disc.
- See the barcode as it is automatically updated on-screen. A two line comment can accompany any barcode.
- Rehearse all LB or LB2 commands with an LB or LB2 compatible player attached to the computer. Pioneer's combination players, the CLD-V2600 or the CLD-V2400, can be used to rehearse LB, LB2 or Barcode CD barcodes.
- Print barcodes to most printers with drivers included in Windows.
- Use the Scanner window included with the program to easily copy and paste barcodes into other programs through the Windows Clipboard.

Additional features include:

- DDE support, dBase IV compatible files, support for over 80 pre-defined Avery Label layouts and custom layout creation, save barcodes as BITMAPs.

Note: For details about LB and LB2 see **Tech Bulletin #132A, LaserBarcode 2 Commands and Logo**; and **PIB#16 LaserBarcode Formats and Player Compatibility**. For more information on Barcode CD see **Tech Bulletin #140, Barcode CD and the CLD-V2600/2400**.
